

## Comparing celestial bodies

# Comparing celestial bodies

**Adjectives describe nouns.**

Some examples are: large, big, small, cold, hot, bright, slow or fast.

*For example: Jupiter is large.*

**Comparative adjectives** compare two nouns.

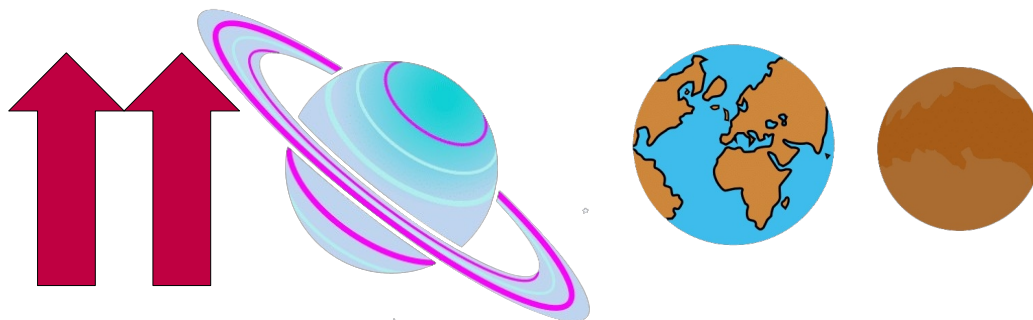

They are formed with the "**adjective + -er + than**".

*For example: Earth is **larger than** Mars.*

**Superlative adjectives** compare three or more nouns.

They are formed with "**The adjective + est**".

*For example: Saturn is **the largest** planet.*
